I want a good handwritten recognition system

The system should be user friendly

Is it suitable for all languages?

Whether it satisfy my expectation?

I want a system which gives more than 70% accuracy

I Want a system with quick response

Says

Compare

with other

recognition

system

Checks the

system

reliablity

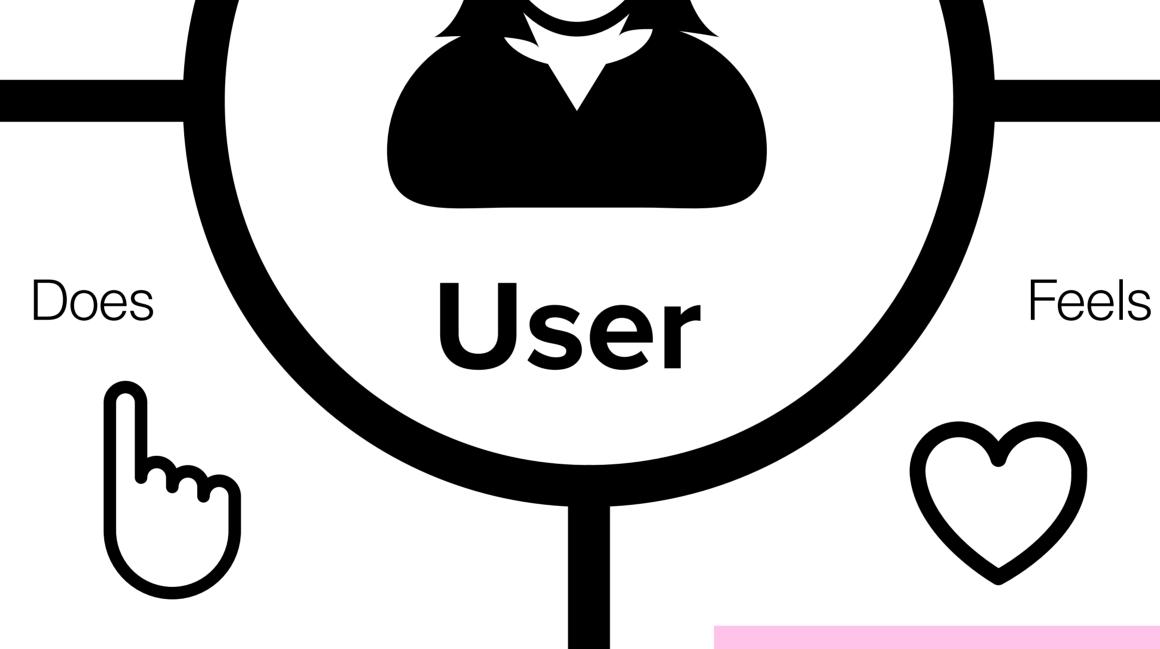

Whether it is suitable for illegible Handwriting also??

Thinks

May be this isn't the best ?

User uses this system regularly

Recommend this system to others

Feels
frustrated
when it does
not function
properly

Impatient when error message occurs repeatedly

More excited when it meets their satisfaction

Happy when satient it is accessible to essage everyone
